

ZERK PRESS

Complete Competence in
Series of Suction Press Roll &
Rolls Covering

Amar Elastomers has the strength to combine the overall performance parameters of Suction Press Roll.

We design for:

- Optimise Material Selection.
- Roll Rubber Cover.
- Complete Suction Box (With Internal).
- Flush Through Type Showers (Lubricating & Pressure Cleaning)
- Deckle Adjustment System.
- Head Fit Improvements.

The costliest Roll to be maintained on a Paper Machine is Suction Roll. We modernize the Suction Roll to raise the roll performance to the highest levels, so as to perform for:

- Higher Speed of Paper Machine.
- Reduce Maintenance Intervals.
- More operating reliability.
- Better paper stability.

ZERK PRESS SERIES OF COVERINGS:

AMAR has constantly kept the track with the latest polymer developments to deliver the best solutions on rubber covers. Due to the advancement in Paper Machine operating dynamics, various thermal and mechanical Knocks, play a vital role to disturb the stability of the rubber cover. Based on our experience and continuous research of our technicians we had developed ZERK PRESS SERIES of Suction Roll Coverings.

Cover	Hardness	Temp. Max (°C)	Material
Zerk-Press I	10-30 P&J	125	Synthetic Rubber with high dynamic load bearing capacity.
Zerk-Press II	10-30 P&J	110	Standard Synthetic Rubber.

These Covers are designed for high operating speeds and linear load upto 90 Kg/Cm. For more details contact our Service Engineer.
